1. Overview of A40/A41(W)

A40/A41(W)

Type	POE	Power adapter	Wi-Fi	1000M
A40	No	Necessary	No	No
A41	Yes	Optional accessory	No	No
A41(w)	Yes	Optional accessory	Yes	No

1.1. Interface

Power Input	DC 5V-1000mA or POE
LAN Port	RJ45
PC Port	RJ45
Headset Jack	RJ9
Handset Jack	RJ9

1.2. Hardware

LCD	132*52
CPU	400MHz Dual-Core
LED Indicator	1 Status Light

1.3. Software

- Sip 2.0 (RFC3261) and other related SIP RFCs
- 4 SIP line registration
- STUN
- Jitter Buffer, VAD,CNG
- G711A, G711U, G722, G726-16, G726-24, G726-32, G726-40, G729, L16, iLBC_13_3, iLBC_15_2
- Echo Cancellation
- SIP Domain name, Authentication and Backup SIP Server
- DTMF (RFC2833, Inband, SIP INFO)
- Call transfer, Call forward, 3-way conference, Call hold, Call back
- DND(Do Not Disturb), Auto answer, Blacklists, Block Call-ID, Block Anonymous call, Dial plan, IP call
- Phone book with 400 contacts and 200 blacklists
- Call History with 400 records include answered calls, missed calls, dialed calls and forward calls
- Auto update via HTTP, HTTPS, FTP, TFTP, DHCP, RPS and PNP
- Syslog
- SNTP,NTP
- Customized Ringtone
- Daylight Saving time
- VLAN, OpenVPN, Span to PC port, QoS
- 802.1X, LLDP
- Enterprise WIFI

- WEB access with different login level
- Soft button: soft button *4
- Redundancy SIP server
- Multi-language: English, French, Hebrew, Russian, Spanish, Chinese, Persian, Polish, Portuguese, Turkish, German, Italian

1.4. Network

- LAN/PC: Support Bridge mode
- Support VLAN
- Support Open VPN
- Support DHCP, STATIC IP
- Primary/Secondary DNS Server
- Support QoS
- Support LLDP
- Support 802.1X
- Support Span pc port
- Support Enterprise WIFI
- Web access via HTTP&HTTPS

1.5. Management and Maintenance

- Support firmware updating under safe mode
- Support different level user management
- Configuration via web , keyboard
- Support multi-language
- Firmware and configuration file auto provision
- Support system log

1.6. Protocol

- IEEE 802.3 /802.3 u 10 Base T / 100Base TX
- DHCP: Dynamic Host Configuration Protocol
- SIP RFC3261, RFC3262, RFC3263, RFC3264, RFC3265, RFC2543, RFC3489, RFC3842, RFC3515, RFC2976, RFC3428, RFC2327, RFC2782, RFC1889
- TCP/IP: Transfer Control Protocol/Internet Protocol
- RTP: Real-time Transport Protocol
- RTCP:RTP Control Protocol
- DNS: Domain Name Server
- TFTP: Trivial File Transfer Protocol
- HTTP:Hypertext Transfer Protocol

- FTP:File Transfer Protocol

1.7. Compliant and Certified Standard

- CE: AGC01180140201E2, AGC01180140202E2
- Comply with ROHS in EU
- Comply with ROHS in China

- Operation temperature: lower than 60° C
- Storage temperature: lower than 60° C
- Humidity: 10 to 90% no dew

1.8. Packing list

Model	A40/A41(W)
Telephone	1 Unit
Handset	1 Unit
Handset cable	1 Unit
Stand bracket	1 Unit
Wall bracket	1 Unit
Power adapter	Optional for A41,A41(w) Standard for A40
Network Cable	1 Unit, 1.5 meters
Quickstart Guide	1 Unit
Headset	Optional

1.9. Installation

Connect network cable

A40/A41(W) is able to be connected with network via LAN port. Under the Bridge mode, other devices (Laptop, IP phone) is able to access network via the PC port of A40/A41(W).

Connect WiFi

A41W is able to connect the WiFi.

1. Stand bracket installation instruction

A. Put the bottom side of the IP phone upside and press one-side joints of stand bracket into the slot, please refer the picture as below:

B. Press the other side joints into the slot according to the direction of the arrow:

C. It is the right picture after fixing the stand bracket below:

D. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the arrow. When the joints are pulled out of the slot, you can take off the stand bracket

2. Programmable keys' paster using instruction

Step1. Use needle or some other tools to insert into the hole of the plastic sheet, hog the plastic sheet.

Step2. Lift out the plastic sheet

Step3. Take off the plastic sheet

Step4. Use needle or some other tools to insert into the edge of the paster, hog and lift out the paster

Step5. Write down the identification of each programmable key on the paster after taking off the paster

Step6. Put back the paster

Step7. Insert the plastic sheet into the slot

Step8. Push the other side of the plastic sheet into the other slot

3. Wiring instruction

Plug in the power adapter, cable and handset or headset to the corresponding ports as below picture and press them to the slots on the stand bracket.

2. Keypad and GUI

3. Call Function

3.1. Answer the calls

When there is an incoming call, phone will remind user with ringing. There are 3 ways to answer the call:

A. Answer by handset

Pick up the handset and talk with the caller. If you want to hang up, just put back the handset. When you are talking with the handset and want to switch to speaker or headset mode, please press  key or  key, and then put down the handset.

B. Answer by speaker

Press  key and talk with callers by built-in Micro-phone and Speaker. If you want to hang up, please press  key again. Switch calling or talking into handset mode by lifting the handset under speaker mode. Press  key will switch calling or talking into headset mode.

C. Answer by headset

Keep your microphone connected with the RJ9 headset jack, when there is an incoming call, press  and talk with the caller. If you want to hang up, please press  again. Pressing  can change calling or talking into speaker mode, and lifting the handset switches to handset mode.

3.2. Make Calls

A. Use the handset

Pickup the handset, the LCD will show the current lines (user is able to switch from line1 to line4 by pressing the line key beside the LCD). Press soft key "**Send**" to dial the number. When you hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

B. Use the speaker

Press  key, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Input the phone number and press soft key "**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

C. Use the headset

Press  Key, the LCD will show the current lines (user is able to switch from line1 to line6 by pressing the line key beside the LCD). Input the phone number and press soft key "**Send**" to dial the number. When caller hear the tones of "du~~du~~" and the phone number your dialed is being displayed on the LCD, the phone at the side of being called should be ringing. If the called party answers this calling, the call is established and the calling timer is started immediately.

D. Dial from phone book

1. Press  key to enter the menu and choose "**Contact**" option. Press "**Enter**" soft key and then find the contact person by navigation keys. When the certain contact person is highlighted, press "**Dial**" or just pick up the handset to call this number.
2. Pick up the handset, press "**Contact**" soft key, then find the contact person and press "**Dial**" soft key.
3. Pick up the handset, press  and enter "**Contact**", then find the contact person and press "**Dial**" soft key.

E. Dial from call history

1. Press  key to enter the menu and choose "**History**" option, then select one of call history entry, and press "**Dial**" soft key or pickup the handset to call this number.
2. Pickup the handset, press "**History**" soft key, then select one of call history entry, and press "**Dial**" soft key to call this number.
3. Pickup the handset, press  and enter "**Call History**", then select one of call history entry, and press "**Dial**" soft key to call this number.

3.3. Pre-dial

It's a method to dial a phone number immediacy at standby mode.

The method is as below:

A. Dial-up the phone number at standby mode

- B. Press soft key "**Dial**" or Pick up the handset or Press  or  to send out the number.

3.4. Multiple line dial-up

A40/A41(W) supports up to 8 concurrent calls. If there is a new incoming call when you're talking on A40/A41(W), the new incoming call will be displayed on LCD and status indicator LED will be fast blinking. User can press soft key "Hold" then press "Answer" to receive the new incoming call.

3.5. Call Hold

The current calling will be hold by pressing soft key "**Hold**" or , and the held call will be resumed after pressing soft key "**Resume**" or  or the corresponding line key. Even

on 3-way conference calling, the conference will be held after pressing "**Hold**" key, and be resumed to 3-way conference after pressing "**Hold**" Key again. Remember the conversation is still on hold without being ended even if hung up under the status of hold.

3.6. Call Transfer

1. Attended call transfer

The attended transfer allows user to call a third-party before transferring the calling.

While calling, press the "**Transfer**" soft key to hold the current call and dial the target number you want to transfer to on the activated line and press "**Send**" soft key to call that number. After the target party answers the call, press "**Transfer**" soft key again to complete the transfer.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A40/A41(W), there is an easier way to complete the attend transfer. While calling, press the corresponding BLF key of the target number and then press the "**Transfer**" soft key, the attend transfer will be achieved.

2. Blind call transfer

The blind transfer allows user to transfer a call without speaking to the third party. On the user side, the call will be ended as soon as the target phone number is dialed.

Operating steps: Press "**Transfer**" soft key to get more option, then press "**Blind**" soft key, input the transfer target number and press "**Send**" soft key.

If the target number has been setup in the current BLF list, and you have already finished the necessary setup on Webpage of A40/A41(W), there is an easier way to complete the Blind transfer. While calling, press the corresponding BLF key of the target number, the blind transfer will be achieved.

3.7. Mute calls

The input audio will be not transmitted to peer phone after pressing  key, and the phone will be muted even switched among different modes of speaker, handset and headset.

To un-mute, just press  key again.

3.8 3-Way Conference

1. While on calling, press the soft key "**Conf**", input the 3rd party's phone number and then press the softkey "**Dial**" or press the soft key "**Conf**" and press the corresponding BLF key to invite the 3rd party to join a conference call.
2. After the third party answers the call, pressing "**Conf**" key again to establish the 3-way conference
3. The initiator of 3-way conference can press the soft key "**Hold**" to hold the conversation with other two parties, and press "**Resume**" to back to 3-way conference.
4. If the initiator hangs up the call or press the soft key "**End Conf**", the conference will be ended and the calling between the other two parties will be hung up as well.
5. The initiator of 3-way conference can press the soft key "**Split**" to separate the conference call, and the calling between initiator and the other two parties are still active but under the status of Call hold.
6. After split the 3-way conference, press the soft key "**More**" and then press the softkey "**Join**" to resume the 3-way conference or press the softkey "**Conf**" to setup a new 3-way conference call.

3.9. Hang up the phone

1. Softkey hang up

Set Anonymous Call via web: **Account**→**Basic**→**Select the Account**→**Anonymous Call**.

Set Anonymous Call Rejection via web: **Account**→**Basic**→**Select the Account**→**Anonymous Call Rejection**.

4.3. Contacts

The content of Directory includes local phonebook and blacklist. Enter Directory as follow,

1. Press the soft key "Contacts" when the phone is standby

2. Press the navigation key 

3. Press the menu key , and then select "Contacts"

Configure the "Contacts" via Web:

All operations on Directory via Web will be not active until click "Save". When too much item existed in the Directory, it will be an easy way to search by keyword about name, Office Number, Mobile Number or other Number. The exactly matched item will be listed, otherwise you will be prompted "Not find the specified contact".

Local Contacts

Name and phone number are permitted to be saved into the local phonebook, and up to 400 items. It's able to add new group, new contact, edit or delete exist contact or dial, also move the item to blacklist.

Make calls from directory

Path to set on the phone:  → **Contacts** → **Local Contacts** → **All contact** → **Select the record** → **Dial**.

If only one phone number saved with the selected contact person, the phone number will be dialed while calling the contact person.

If multiple phone numbers saved with the selected contact person, user must select one of the phone numbers for dialing while calling the contact person.

Add new contact

Path to add new contact on the phone: **Press**  → **Contacts** → **Local Contacts** → **All contact** → **Add**.

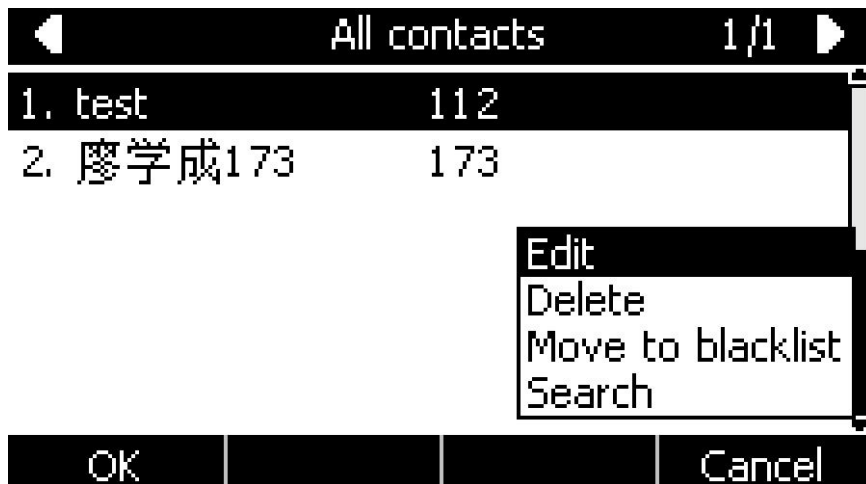

Item	Operation	Description
Name	Input by number keys, "*" or "#" key, change the input-method via pressing the soft key "abc"	It's used to identify different phone numbers. Any reduplicated names are not permitted in the contacts.
Office	Input by number keys, "*" or "#" key, change the input-method via pressing the soft key "abc"	You can save three numbers at most. While calling a contact person in contacts, the phone will redirect to the page that to select one number to dial when multiple numbers are saved for one contact record
Mobile		
Other		
Ring	Press the key   or the soft key "Switch" to modify the account ID.	It's used to bundle each item with the corresponding ringtone, and the optional value is "Auto" or "Ringtone 1" to "Ringtone 10". "Auto" means the default ringtone will be played if new incoming call happened, otherwise the selected ringtone will be played.

Add new contact via web: **Contacts**→ **Contacts**→**Input messages**→**Add**→**Save**.

Edit the contact

User must re-edit the contact item while updating one item of local phonebook.

Path to edit the contact on the phone: Press  → **Contacts**→**Local Contacts**→**All contacts**→ **Select the item to edit**→**Option**→**Edit**→**OK**.

Edit the contact item via Web: **Contacts**→ **Contacts**→**click on the item to edit**→**modify messages**→**Click "Edit"**→**Click "Save"**.

Delete the contact

Path to delete the contact on the phone: Press  →**Contacts**→**Local Contacts**→**All contacts**→**Select the item to delete**→**Option**→**Delete**→ **OK**→**OK**.

Press the soft key "**Cancel**" at the Warning UI to stop deleting.

Delete the contact item via web: **Contacts**→ **Contacts**→**Select the item to delete**→**Click on "Delete"**→**Click on "Save"**.

Move to blacklist

Path to move to blacklist on the phone: Press  →**Contacts**→**Local Contacts**→**All contacts**→**Select the item to move**→**Option** →**Move to Blacklist** → **OK**→**OK**.

Press the soft key "**Cancel**" at the Warning UI to stop this operation.

Move the contact item to blacklist via web : **Contacts**→ **Contacts**→**Select the item to move to blacklist**→**Click on "Move to black List"**→**Click on "Save"**。

Blacklist

The purpose of blacklist's feature is to block the phone number inside blacklist to call the host phone number, but it's available for the hosted phone number to call any phone number in the black list.

The most operation of blacklist is the same as local phonebook except for the feature “Move to Contacts”, it means moving an item of blacklist to local phonebook to resume the phone number to dial the host phone number normally.

Remote phonebook

The screenshot shows the 'Remote Phone Book' configuration page. At the top, there is a navigation bar with tabs for 'Basic', 'Account', 'Network', 'DSS Keys', 'Phone', and 'Contacts'. The 'Contacts' tab is selected. On the left side, there is a sidebar menu with options: 'Contacts', 'Remote Phone Book' (highlighted), 'LDAP', and 'Phone Call Info'. The main content area contains a table with 5 rows for configuring remote phonebooks. Each row has an 'Index' column, a 'Remote URL' input field, and a 'Display Name' input field. Below the table is a 'Search Settings' section with two options: 'Search Remote Phonebook name' (set to 'Enable') and 'Search Flash Time' (set to '120'). At the bottom of the settings section are 'Confirm' and 'Cancel' buttons.

Index	Remote URL	Display Name
1	<input type="text"/>	<input type="text"/>
2	<input type="text"/>	<input type="text"/>
3	<input type="text"/>	<input type="text"/>
4	<input type="text"/>	<input type="text"/>
5	<input type="text"/>	<input type="text"/>

Search Settings

Search Remote Phonebook name i

Search Flash Time i

1. Remote URL: Set a remote phonebook download path. Support the TFTP,FTP,HTTP and HTTPs server.
2. Display name: Set a display name on the phone.
3. Search Remote Phonebook name: Select “Yes” or “No” to enable or disable search remote phonebook name.
4. Search Flash Time: Set the search flash time. Defaults to 120.

Set password via Web: **Phone**→**Security**.

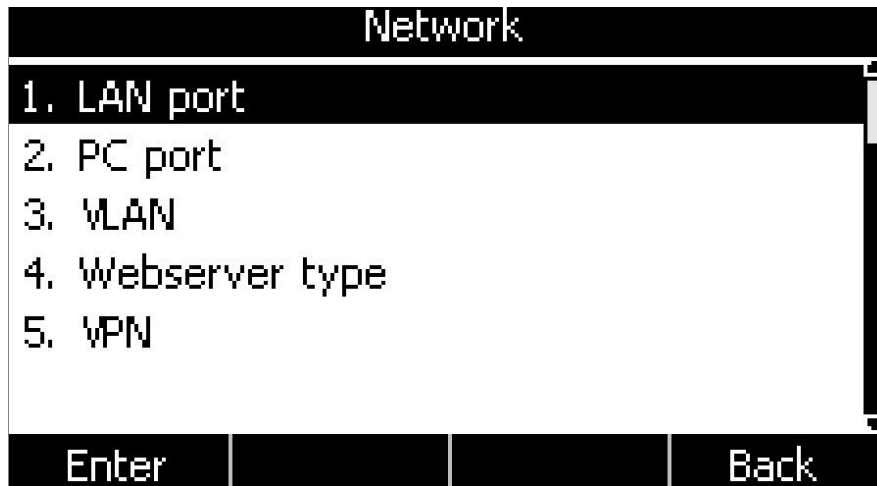

The screenshot shows the atcom web interface with the 'Phone' tab selected. The left sidebar contains a menu with 'Security' highlighted. The main content area displays the 'Password Modify' form. The form includes a 'User Type' dropdown menu set to 'admin', and three input fields for 'Current Password', 'New Password', and 'Confirm Password'. Below the input fields are 'Confirm' and 'Cancel' buttons.

3. Network

Path to set network parameters on phone: **Press**  → **Settings**→**Advanced Settings**→**Input the password**→**Network**.

please move the navigation key to check more:

➤ LAN Port

Connect the phone with local network via LAN port, to gain IP address in 3 ways: DHCP, Static. Set the LAN port via Web: **Network**→ **Basic**.

DHCP

The phone gains IP address via DHCP and Static DNS by default.

STATIC IP

If the phone gains IP address via Static IP, user must input the IP address info manually.

➤ PC Port

Only bridge mode support by PC port.

➤ VLAN

The feature of VLAN must be supported by network switch, and by default this feature it's not activated.

Set the VLAN via Web: **Network** →**Advanced**→**VLAN**.

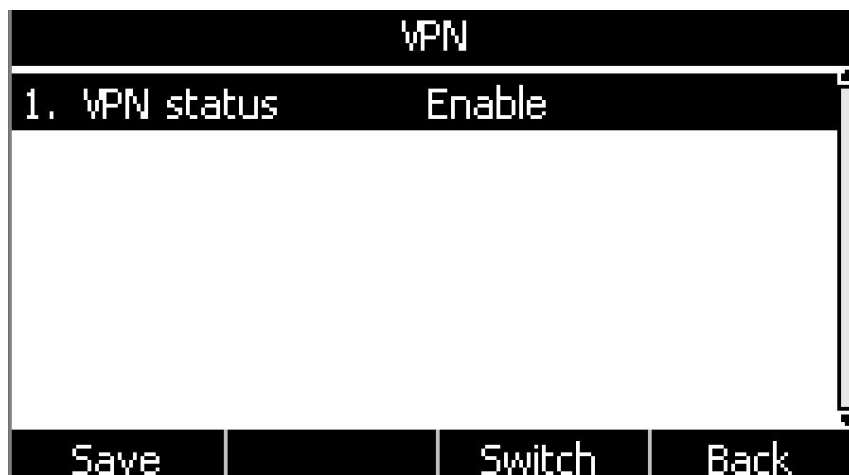

➤ Webserver Type

Webserver type include HTTP and HTTPS, different access port will be required by different access type, user is able to confirm the port info at the webpage, HTTP & HTTPS are both permitted by default.

Set Webserver type via Web: **Network**→**Advanced**→**WebServer**→**Type**.

➤ **VPN**

A40/A41(W) support the feature of Open VPN, and this feature must be supported by VPN Server.

Set the VPN via Web: **Network** →**Advanced**→**VPN**.

➤ **LLDP**

A40/A41(W) supports LLDP, and enable in default. If the phone is connected to a switch and using LLDP, the switch would notifies IP phone of VLAN information.

Set the LLDP via Web: **Network** → **Advanced** → **LLDP**

atcom		Basic	Account	Network	DSS Keys	Phone	Contacts

1. Keypad Lock Enable: select "Yes" or "No" to enable or disable keypad lock

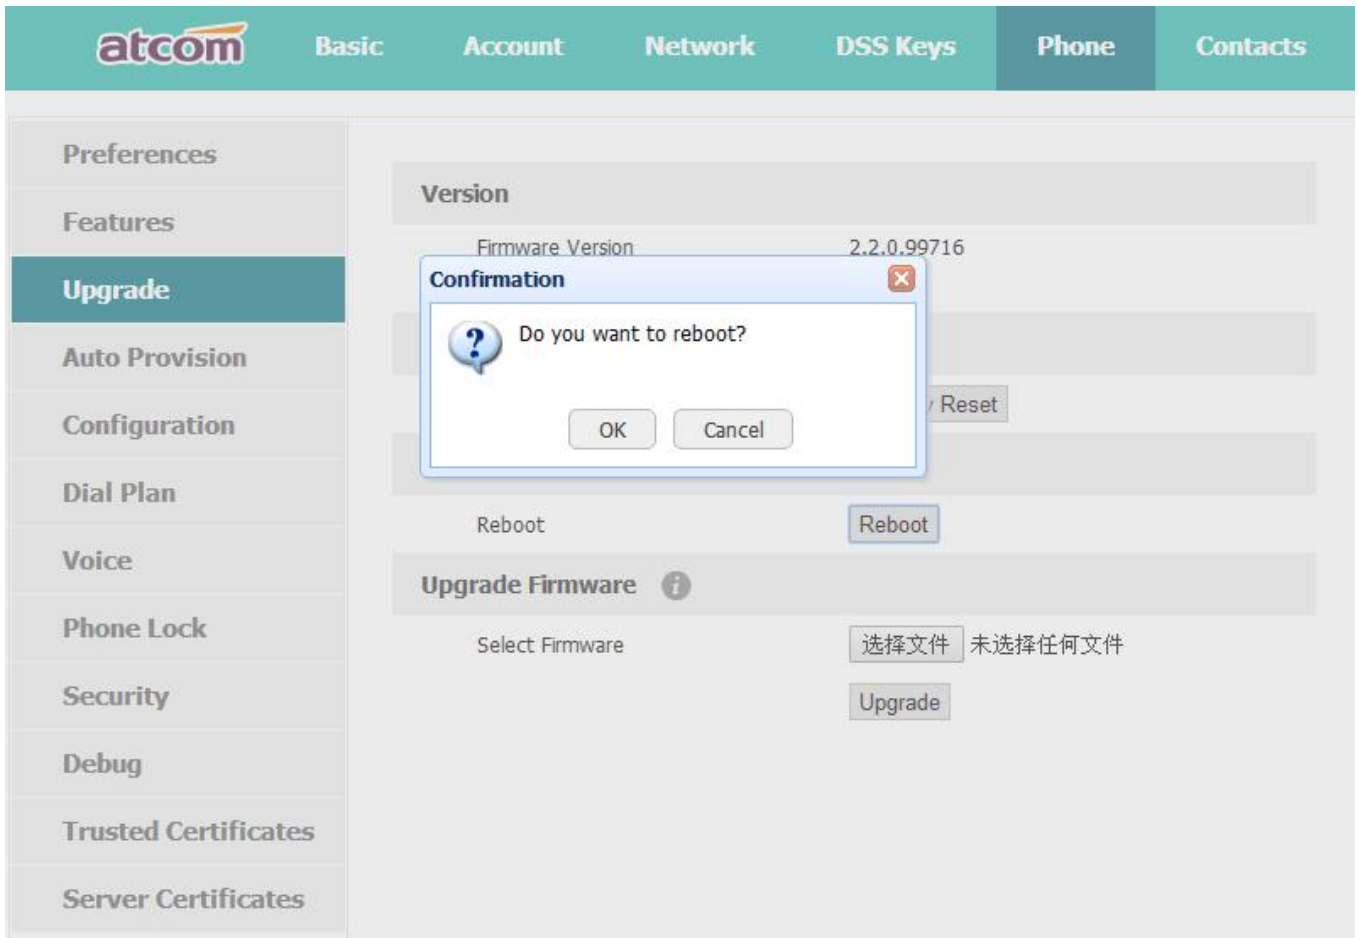

2. Keypad Lock Type: Menu key/Function keys/All keys/Answer call only.
3. Phone Unlock PIN(0~15 Digit):set the phone unlock PIN. Range: 0~15 digit.
4. Phone Lock Time Out(0~3600s): set the phone lock time out. Range: 0~3600s
5. Emergency :set emergency number. Default to 110.120.119 and 911.

5. Reboot

After the restart, the phone will back to standby interface.

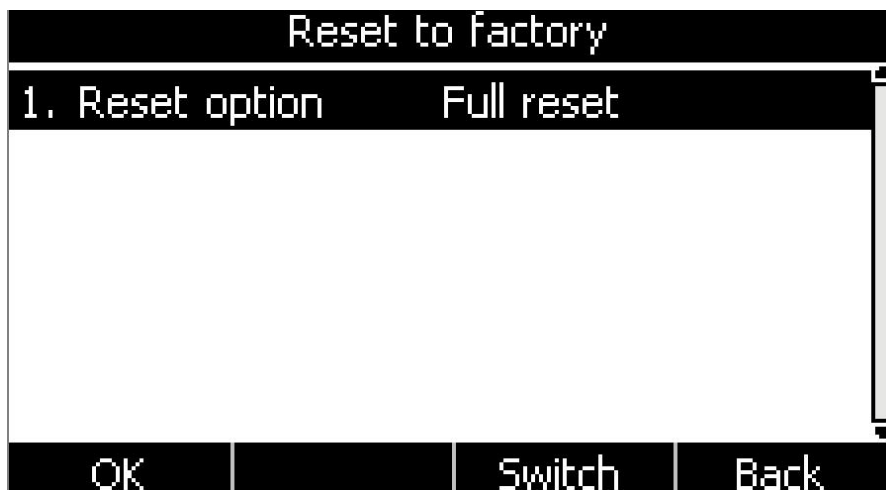

Reboot via webpage: **Phone→Upgrade→Reboot**

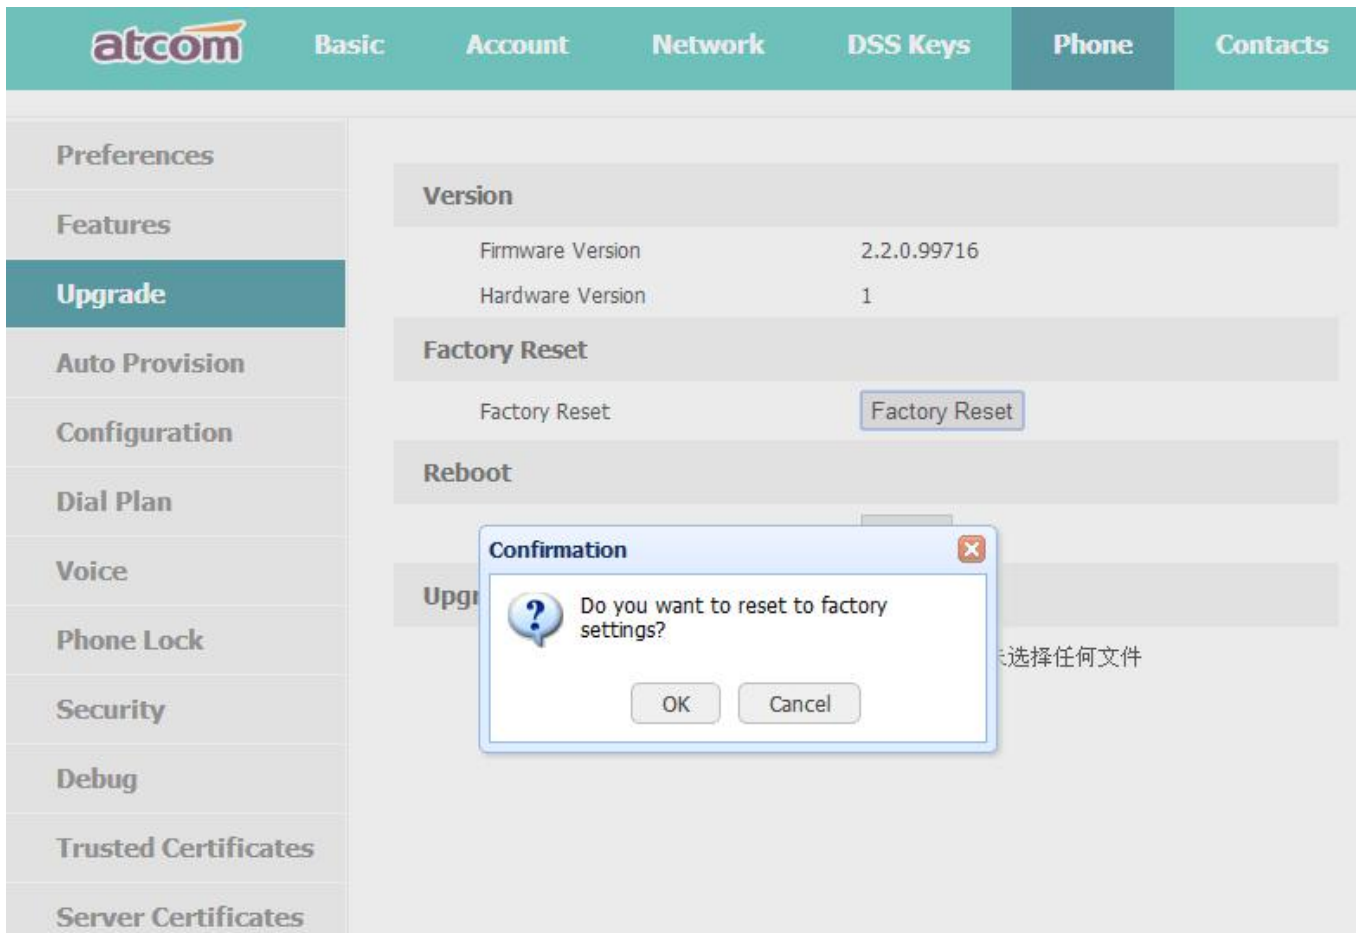

6. Reset to factory

Once reset to factory, all parameter settings will back to the factory default value, and all configure will be cleared, users must be careful on this.

Reset Option: **Full Reset**, **Config Reset** and **UserData Reset**.

Reset to factory via Web: **Phone→Upgrade→Reset to Factory.**

4.7. Display

For more convenient, users are able to adjust the contrast grade and backlight of the main LCD display.

1. Slave Contrast

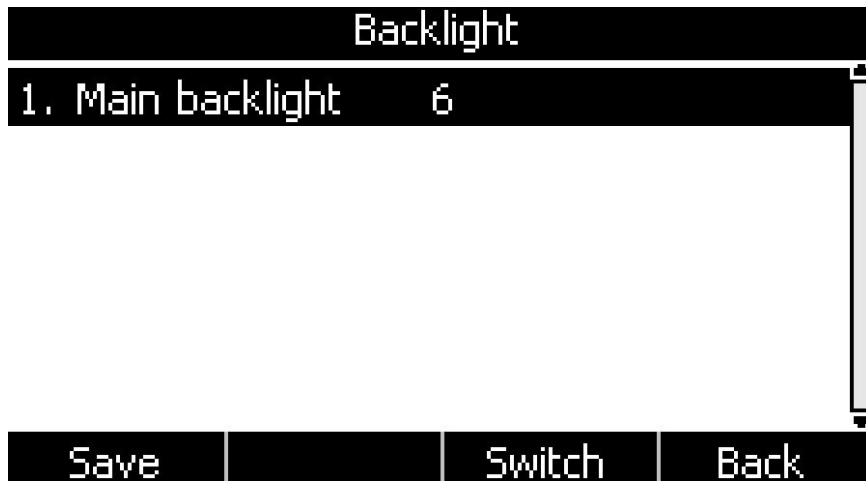

There are 9 different contrast grades for options, press the soft key "Switch" or the

key   for modification, 8 is the default value.

2. Backlight

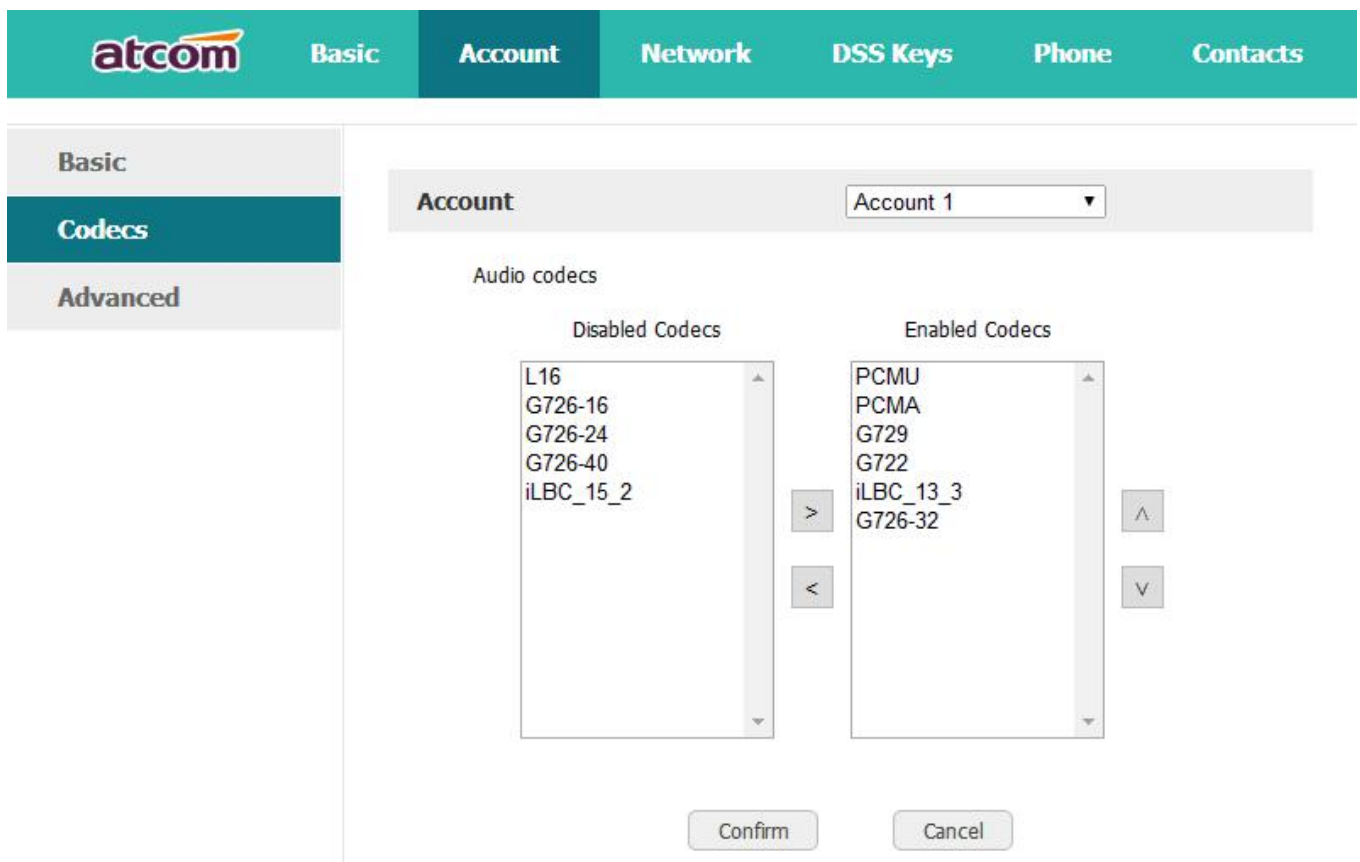

Backlight is the brightness of LCD, also it has been defined as 9 different grades. The number "9" means the lightest.

5. Advanced Feature

5.1. Codecs

A40/A41(W) support multiple codecs, users can select the codes via Web.

 means to enable the item of “Disabled Codes” ;

 means to disable the item of “Enabled Codes” ;

Click the button  or  to sort all enabled codes, the top item has the highest priority.

Note: Multiple different items of G726, iLBC should not activated simultaneously.

5.2. Capture and Upgrading

Capture package:

It would record the phone current info.

Via webpage: **phone**→**Debug**→**PCAP Feature**

The screenshot shows the ATCOM web interface with a teal header containing the logo and navigation tabs: Basic, Account, Network, DSS Keys, Phone, and Contacts. On the left is a vertical sidebar menu with options: Preferences, Features, Upgrade, Auto Provision, Configuration, Dial Plan, Voice, Phone Lock, Security, and Debug (highlighted in teal). The main content area displays two sections: 'PCAP Feature' and 'Debug'. The 'PCAP Feature' section includes a 'PCAP Feature' label and three buttons: 'Start', 'Stop', and 'Export'. The 'Debug' section includes an 'Export' button.

Click the button "Start" to start the capture and click the button "Stop" to end the capture. Then click the button "export" to download the capture file.

Upgrade firmware:

Via webpage: **phone** → **Upgrade** → **Upgrade Firmware**

The screenshot displays the ATCOM web interface. At the top, there is a navigation bar with the ATCOM logo and tabs for 'Basic', 'Account', 'Network', 'DSS Keys', 'Phone', and 'Contacts'. The 'Phone' tab is selected. On the left side, there is a sidebar menu with options: 'Preferences', 'Features', 'Upgrade' (highlighted), 'Auto Provision', 'Configuration', 'Dial Plan', 'Voice', 'Phone Lock', 'Security', 'Debug', 'Trusted Certificates', and 'Server Certificates'. The main content area shows the 'Upgrade Firmware' section. It includes a 'Version' section with 'Firmware Version' (2.2.0.48be2) and 'Hardware Version' (12). Below that is a 'Factory Reset' section with a 'Factory Reset' button. Then a 'Reboot' section with a 'Reboot' button. The 'Upgrade Firmware' section has an information icon, a 'Select Firmware' label, a text input field, a 'Browse...' button, and an 'Upgrade' button.

Before upgrading the firmware of phone, users are suggested to check the version of current firmware. Click the button "Choose file" to select the target local file and click "Upgrade" to process upgrading, this will cost a couple of minutes. And after reboot, the phone will be upgraded successfully.

4.3. Auto Provision

User is able to configure the phone to upgrade automatically.

Item	Description
PnP Active	Select "On" or "Off" to enable or disable PNP automatic updates
DHCP Active	Select "On" or "Off" to enable or disable DHCP option automatic updates
Provisioning Server	The address to save control file for auto upgrading, it can filled by http, https, tftp and ftp server, for example, tftp://192.168.1.111
User Name	The username to access the file server
Password	The password to access the file server
Common AES Key	Configures the plaintext AES key for decrypting the Common CFG file
MAC-oriented AES KEY	Configures the plaintext AES key for decrypting the MAC-oriented CFG file

Check New Config	If set this parameter as "On", the phone will do some check for upgrading, and it will upgrade automatically once the conditions are met
Repeatedly	If set this parameter as "On", the phone will do some check for upgrading after "Interval(minutes)", and it will upgrade automatically once the conditions are met
Interval(minutes)	This parameter is configurable once the Repeatedly is "On"
Weekly	If set this parameter as "On", the phone will do the check for upgrading at a certain time in every week
Time	The time range that the phone do the check for upgrading every week, and it's configurable once the Repeatedly is "On"
Day of week	The day of week that the phone do the check for upgrading every week, and it's configurable once the Repeatedly is "On"

5.4. Export & Import configuration file

If user wants to set the same configuration on multiple phones, there is an easy way that export the configuration file from one phone and then import this file into other phones. This operation can be completed via Web only.

5.4.1. Export configuration file

There is two ways to export the configuration files,

- Don't check the "Export User Data" and click "Export" directly, it will export the template of the configuration file;
- Check the "Export User Data" and then click "Export", it will export a configuration file that carries with user's configured data.

To modify the exported configuration file, you should to decompress it until you get a file names as configuration.

Name	Date modified	Size
configuration	2014/10/10 11:14	
config.tar.gz	2014/10/10 11:14	9 KB

The content of configuration file listed as below,

Name	Date modified	Type	Size
Calllist	2014/10/10 11:14	File folder	
Contacts	2014/10/10 11:14	File folder	
DialRule	2014/10/10 11:14	File folder	
Features	2014/10/10 11:14	File folder	
Network	2014/10/10 11:14	File folder	
Phone	2014/10/10 11:14	File folder	
Setting	2014/10/10 11:14	File folder	
voip	2014/10/10 11:14	File folder	

5.4.2. Import configuration file

Click the button "Choose file" to select the target file for importing, and then click the button "Import". The phone will be rebooted a couple of minutes later, and import successfully.

Note: If some part of the configuration file has been modified manually, it must be re-compressed as the format of "tar.gz" in Linux

5.5. Export System log

When the phone doesn't working well, System log is the best assistant tools for troubleshooting, all operation details has been recorded. This operation is available via Web only.

Export System Log

Log Location Local Server i

Server Name

Log Level

Item	Description
Log Location	You can import the system log to local PC or remote Server.
Server Name	User must fill the address of server if you choose to export the system log to remote server.
Log Level	It defines the detail of system log as 5 different levels, Fatal, Error, Warning, Info, and Debug. The Debug level is the most detailed.

5.6. Dial plan

The customized Dial Plan are available , for example , the rule of replacement, Instant Calling, Area code, Restriction of Outbound.

Before customizing the dial plan, user must learn the basic grammar as below,

.	Represent a character or multiple ones, e.g., "6." can match "66","678","6plus" and so on
x	Represent one character, e.g., "6x" can match "61","62", " 6s" and so on
[]	Represent a character in one range, e.g., " 83[0-5]18618"can match"83018618","83488618" and so on
()	Represent the combination of characters, e.g., "([1-9])([2-7])3" can match "923","153","773" and so on
\$	Add a number after the character "\$" to define the location of the characters, e.g., use the prefix " 8([1-3])(.)" to replace "7\$2", the phone will call "7837" after dialing out "82837"

Note: Any operations (add, modify or delete) on the current dial plan will be not effective until click "Save".

5.6.1. Replace Rule

Dial plan "Replace Rule" means to replace a batch of complicated character string by some simple characters, to make a speed dial.

Item	Description	Sample
Number	The string works as replacer, not null	Set Number as "6",
Replace	The string that to be replaced, not null	Set Replace as "6032",
Account	The account to apply this dial plan, blank or 1~4 is valid.	Set Account as "1".
Add	Multiply replace rules can be configured in one phone, after one replace dial plan configured, click this button to add a new one	It means when dial 6, the phone will dial 6032.
Edit	The existed replace dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields "Number" and "Replace" shows the details correctly. After modifying, click button "Edit" to make it to be effect	
Delete	Delete one added or saved replace dial plan or multiple ones, click the frame after the specified replace dial plan before delete it, and then click button "Delete"	

Save	Any alteration won't take effect until the button "Save" is clicked.	
-------------	--	--

5.6.2. Dial-now

Dial plan "Dial-now" permits the corresponding phone to be dialed instantly without pressing the soft key "Dial", once the input has been matched. It works like a hotline.

Item	Description	Sample
Dial-now Rule	The string to be dialed out automatically by the phone	Set "Dial-now Rule" as 6xxx, keep "Account" as null
Account	The account to apply this dial plan, blank or 1~4 is valid.	It means the phone will use the 1st available account to call 6033 after "Dial-now Time-out" seconds when inputting four figures begin with 6
Add	Multiply dial-now rules can be configured in one phone, after one dial-now dial plan configured, click this button to add a new one	
Edit	The existed dial-now dial plans are editable. The specified dial plan should be selected until it is covered with orange and the input fields "Number" and "Dial-now" shows the details correctly. After modifying, click button "Edit" to make it to be effect	Note: Dial-now rule is different with hotline. The Dial-now rule will take effect when input numbers

Delete	Delete one added or saved dial-now dial plan or multiple ones, click the frame after the specified dial-now dial plan before delete it, and then click button "Delete"	matches the dial plan, and hotline takes effect in situation that the phone is in dialing state
Save	Any alteration won't take effect until the button "Save" is clicked.	

Set "Dial-now Time-out" via web: **Phone**→**Features**→**General Information**→**Dial-now Time-out (secs)**.

5.6.3. Area Code

Dial plan "Area Code" has been defined to identify each different area. To call a phone number of other areas, user must add the area code to be in front of the phone number. For convenience, area code has been recommended to be configured while frequently dialing to that type of phone number.

Item	Description	Sample
Code	The area code dialed before the number	Set "Code" as "0086577",
Minimum length	The minimum length of the number input to activate the area code dial plan	Set "Minimum length" as "5".
MA41(w)imum length	The mA41(w)imum length of the number input to activate the area code dial plan	It means when dialing 83018618 with the 5 th account, the phone will dial 0086577 before it.
Account	The account to apply this dial plan, blank or 1 is valid.	Note: If the length of the number input in the dial UI

Confirm	Apply this dial plan	is not between minimum length and the mA41(w)imum length, area code will not take effect
Cancel	Recover all input fields to the state that saved at latest time	

5.6.4. Block Out

Dial plan "Block out" is used to prohibit the phone number outgoing call from some accounts.

Item	Description	Sample
Block Out Number	The number that prohibited	Set "Block Out Number 1"as"10086" It means the phone will enter the "Call End" UI when dial "10086"
Account	The account to apply this dial plan, blank or 1	
Confirm	Apply this dial plan	
Cancel	Recover all input fields to the state that saved at latest time	

6. WI-FI(only for A41W)

6.1. Configure the WIFI on the phone

1. Press “**Menu**”→“**WIFI Settings**”→“**Switch**”, open the WIFI connection mode.
2. Please move the navigation key to check the WIFI you want to connect, Press “**Connect**”, then input the correct wifi password.
3. Return to the standby interface, and phone successful connected to the wifi.
4. The last option is Manual setting, press ‘Enter’, then input the SSID and password.

6.2. Configure the WIFI on the WEB

A41(w)W connect to network via Wi-Fi acquiescently, click “**Search Wi-Fi**” button to search the available Wi-Fi.

The screenshot shows the ATCOM web interface for configuring Wi-Fi settings. The top navigation bar includes the ATCOM logo and tabs for Basic, Account, Network, DSS Keys, Phone, and Contacts. The 'Network' tab is selected. On the left, a sidebar menu shows 'Basic', 'Wi-Fi', and 'Advanced' options, with 'Wi-Fi' highlighted. The main content area is titled 'Wi-Fi Setting (When wifi is on, please disconnect the network cable!)'. It features a 'Wi-Fi' toggle switch set to 'On', a 'Search Wi-Fi' button, and input fields for 'Current SSID' and 'Secret Key'. At the bottom, there are 'Confirm' and 'Cancel' buttons. The top right corner shows a language dropdown set to 'English' and a 'Logout' link.

After all available Wi-Fi hotspots are list out, click the round behind the available Wi-Fi which you want to connect.

Index	SSID	Signal	Select
1	cisco	211	<input type="radio"/>
2	360	207	<input type="radio"/>
3	re	207	<input type="radio"/>
4	amoji	205	<input type="radio"/>
5	CHINA TELECOM	205	<input type="radio"/>
6	360_____WIFI-C9	197	<input type="radio"/>
7	_____	197	<input type="radio"/>
8	_____	190	<input type="radio"/>
9	inWatch3	189	<input type="radio"/>
10	ChinaNet-7A6t	188	<input type="radio"/>
11	360_____WIFI-9F	185	<input type="radio"/>
12	iTV-7A6t	185	<input type="radio"/>
13	inWatch2	185	<input type="radio"/>
14	Royale International China	184	<input type="radio"/>

Input the right **"Secret Key"** and then click the **"Confirm"** button, the phone will reboot, after rebooting, the Wi-Fi icon will display on the home screen, it means connect failed when the icon come with , then you should check the configuration. if the icon come with , it means connect successfully.

6.3. Enterprise WiFi

It supports WPA/WPA2 Enterprise wifi , it is based on Radius sever and configuration the Enterprise wifi in the router.

Configure the Enterprise wifi:

1. Upload the Certificates

Via the webpage: **"Phone"**→**"Trusted Certificates"**

Index	Issued To	Issued By	Expiration	Delete
0				<input type="checkbox"/>

Import Trusted Certificates

Load trusted certificates file

2. Input the WIFI account info

Via the webpage: "**Phone**"→"**Network**"→ "**WIFI**"

Press the "Search WIFI", and select the SSID, then input the radius ID and password.

Via the phone:

Press "**Menu**"→"**WIFI Settings**", and select the SSID , then input the radius ID and password.

7. FAQ

7.1. How to reset to factory

There are 3 methods for factory reset:

1. Factory reset via phone:

- a) Press the key 
- b) Select "Settings", then press the soft key "Enter"
- c) Select "Advanced Settings", then press the soft key "Enter"
- d) Input the access password, then press the soft key "Enter"
- e) Select "Reset to factory", then press the soft key "Enter"
- f) Press the soft key "OK", then the phone will be reboot and resumed to factory default settings

2. Factory reset via Web:

- a) Key in the IP address of phone with a browser,
- b) Access the webpage of phone as the role of "admin", username/password is admin/admin.
- c) Select "Phone"
- d) Select "Upgrade"

- e) Click the button "Reset to Factory"
 - f) Click the button "OK"
3. Factory reset during starting:
- a) Hold the key "*" and "#" while power on for 5 seconds
 - b) The phone will be reboot and resumed to factory default setting

7.2. Upgrade the firmware on safe mode

If the phone can't be started successfully, user is able to upgrade the firmware on post mode,

- a) Setup a TFTP Server and set the PC's IP address as "192.168.1.200"
- b) Copy the kernel file we supplied to the root menu of TFTP Server
- c) Ensure the TFTP Server and phone are connected to the same network switch and both reachable
- d) Long Press the key "*" and "1" to upgrade the kernel file, and then plug in power until upgrading information displayed on LCD
- e) The phone will start downloading file from TFTP server
- f) After downloading completed, the phone will be automatically upgraded
- g) After upgrading completed, the phone will be started with the factory default settings

7.3. How to make IP Peer to Peer call

1. Press it in dialing status
2. To make a IP peer to peer call

Switch the input type to '1a', then press '*' key to choose '.'. For example, to dial "192.168.1.100":

1. Change to '1a' input method;

2. input "192", "*", "168", "*", "1", "*", "100"

3. Disable the IP call feature

Via webpage modify the make IP call feature:

Phone→Feature →Accept SIP Trust Server Only, press "Enable".

The screenshot shows the 'Phone' settings page in the atcom web interface. The 'Accept SIP Trust Server Only' option is highlighted with a blue border and is set to 'Enabled'.

Setting	Value	Info

8. Troubleshooting

8.1. The phone is failed to register to SIP server

1. First of all, check the IP address. If the LAN port is DHCP, please ensure the DHCP server has been enabled.
2. Check the network gateway
3. Check the DNS
4. Make sure the input account matched the one provided by Service Provider
5. Make sure SIP Server has been enabled already
6. Make sure the Port of SIP Server, it's 5060 by default

8.2. The phone is failed to gain IP address

1. Make sure the network cable has been plugged into the LAN port
2. Make sure the network cable or port of network switch are working fine,
3. Make sure the DHCP server has been enabled, and there are available IP address
4. Try to set the LAN port as Statics IP

8.3. Only one party can hear from another on calling

1. Try to make a IP peer to peer call, to make sure the mic and speaker are working fine
2. Enable STUN via Web
3. Set the address of STUN Server, for example stun.sipgate.com
4. Present this operation above and the phone will be reboot
5. Try to make a normal call again

9. Abbreviation

DND: Do Not Disturb

CFWD: Call Forward

Bxfer: Blind Transfer

Conf: Conference

Num: Number

SIP: Session Initiate Protocol

RTP: Real-time Transport Protocol

SDP: Session Description Protocol

VPN: Virtual Private Network

VLAN: Virtual Local Area Network

QoS: Quality of Service

Syslog: System log

UDP: User Data Protocol

TCP: Transmission Control Protocol

TLS: Transport Layer Security Protocol

BLF: Busy Lamp Field

DNS: Domain Name System

SRTP: Secure Real-time Transport Protocol

NTP: Network Time Protocol

VAD: Voice Activity Detection

CNG: Comfort Noise Generator

10. FCC Caution

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) The device may not cause harmful interference, (2) the device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
