G. Disassemble the stand bracket:

Push the spring joint of stand and pull the stand according to the direction of the

arrow.

### 1.3 Check IP

Rainbow1 use DHCP mode by default, and you can review its current IP address by pressing  key when it is powered on and connected to the network.

### 1.4 Login to web

Modify your computer's IP address to the same network as Rainbow1. Enter Rainbow1's IP address in the web browser and press Enter, then you will access to Rainbow1's user webpage without password.

Click 'admin' which is on the right corner to enter administrator webpage.

## 2. Configure phone to register SIP account

### 2.1 Network Configuration

#### LAN Port Configuration

Enter "Network" -> "Basic" page.

There are 3 ways to connect to internet DHCP, Static and PPPoE, please choose

one according to your own situation.

- ✓ Network mode: you can choose DHCP, Static and PPPoE
- ✓ DHCP: Rainbow1 default to use DHCP to obtain IP from DHCP Server.
- ✓ Static: If you want to set the IP as static, you should fill IP, Netmask, Gateway and DNS information.
- ✓ PPPoE: If Rainbow1 is connected to the modem, you should fill ADSL account and password which are assigned by your network service provider.

## Password Configuration

Enter "Network" -> "Advance" page.

There are 2 modes to set the authority of web accessing and command line: User mode and Admin mode. All the parameters can be visible and changed in Admin mode while part of them can be visible in User mode.

- ✓ Enable Web Server: enable or disable web access. If choose "no", you can not access Rainbow1's webpage.
- ✓ Admin password: set admin webpage access password.(username:admin)
- ✓ User password: set user webpage access password.(username:user)

## 2.2 Account Configuration

Enter "Account" -> "SIP" page to configure SIP account which is provided from the SIP Server.

SIP

Display Name :	<input type="text"/>	User ID :	<input type="text"/>
Authenticate ID :	<input type="text"/>	Password :	<input type="text"/>
SIP Server :	<input type="text"/>	SIP Port :	<input type="text" value="5060"/>
